Subject: Meeting re Alfred Heller Heat Treating, Administrative Record TDD TO 0013-0025 and
Removal Action TDD 0013-0024

Cris:

Thanks for meeting with me yesterday. I will copy the documents you gave me for the administrative record and will return the documents to you by EPA inter office mail. We will put in the record the documents we discussed and leave out the documents we marked with tags. We will also leave a space in the record for an action memo which you are preparing. The action memo should be available by the end of the week.

With regard to the removal action, as we discussed, the TDD for the removal action will have to be amended before onsite support can be provided. As the TDD is currently written, it covers only one day of onsite activities for supporting the auction which already occurred. We discussed in general what the site support might consist of: ERRS contractor oversight and maintaining site log documentation, and photo documentation. If you will outline a scope of work in a TDD amendment, RST can provide it.

With regard to my availability, I do have site work scheduled for July 21. There is some associated planning and reporting time as well.

If you have any questions or comments, please do not hesitate to contact me.

Sincerely,

Gary

Gary Boyer, P.E.
